Accounting Problems and Solutions I Accountancy Knowledge

A training in accounting requires students to develop problem solving skills. These skills are developed through the use of case studies. Many of those cases have the same structure: some data are provided and students are invited to compute one or more unknowns. The main issue in our research was the computation of 'operating income'.

Managerial Problems and Marginal Costing

Accounting is based on the principle of two-sided. In order to carry out business activities, the company needs funds; these funds must be given to the company by someone. The funds owned by the company are called assets. Part of these assets is provided by the owner, total amount of funds contributed by him is called owner's equity or capital. If the owner is the only one who contributed ...
